Daniel Bonilla Gonzalez

IT Engineer | Full-Stack Python Developer | Data Analyst

Mexico City nakajito@proton.me 56 4285 9470 dabg.dev
daniel-bonilla-866b4320a Nakajito

Summary

IT Professional with over 2 years of experience in web development, data analysis, and technology project management. Specialized in Python, Django, SQL, and Cybersecurity, holding certifications from Microsoft and Google.Expert in developing applications with the Reflex framework and Open Source Intelligence (OSINT) tools for data investigation

Education

Jan 2023 – Aug 2025 **CNCI University**, BS in Information Technology Engineering – Mexico City, Mexico

- HTML and CSS certification from Information Technology Specialist (2023)
  - Certiport (mWAN-DwVk)
- Python certification from Information Technology Specialist (2023)
  - Certiport (JTT8-4wb2)
- English B2

Aug 2008 – Aug 2012 **Naval Academy**, AAS in Naval Electronics and Communications – Veracruz, Mexico

- Naval Communications Specialist

Experience

Feb 2008 – present **Lieutenant Junior Grade (Navy)**, Secretariat of the Navy (SEMAR), Mexico – Mexico City, Mexico

- Led IT infrastructure investment projects, achieving resource optimization and increased operational efficiency.
- Designed and implemented document search and control systems, improving access to and organization of critical information.
- Coordinated multidisciplinary teams in technological innovation projects, ensuring fulfillment of strategic objectives.
- Performed data analysis to support decision-making in administrative and operational management.
- Developed an information query system that integrated multiple data sources from different departments, enabling centralized access, cross-departmental data analysis, and improved decision-making.

Projects

Nov 2025 **Osint Hub**

Designed and implemented a web-based platform integrating multiple OSINT tools for email verification, username searches, and phone number analysis.

- Built fast, secure search modules leveraging open-source reconnaissance libraries and APIs.
- Designed modular architecture with potential for metadata extraction and additional OSINT workflows.

Feb 2025 **Secure Password Generator**

Developed a secure online tool for generating strong, random passwords using cryptographically secure techniques and providing real-time strength feedback.

- Implemented client-side cryptographically secure random password generation with support for letters, numbers, and special characters.
- Integrated a real-time password strength indicator to help users evaluate the security of generated passwords.
- Built intuitive UX features including one-click copy to clipboard for seamless user interaction.
- Ensured full privacy and security by generating passwords locally without storing user data.

Certification

- Microsoft Certified Azure Fundamentals – Microsoft (2022), credential ID I410-8635
- Foundations of Cybersecurity – Google (2023), credential ID 2WFGK8LSD73Q
- e-lanX Cloud 2024 Online Freelancing Skills Training – Wisar (2024), credential ID 2024MX030
- Google Cloud Computing Foundations Data, ML, and AI in Google Cloud – Google (2024), credential ID 7508205
- Google Data Analytics Professional Certificate – Coursera & Google (2024), credential ID L3NYUZVANREC
- Bootcamp Web Developer - Universidad del Valle de Mexico UVM (2024)

Skills

Programming Languages: Python, CSS, HTML, JavaScript

Frameworks: Django, Reflex, Tailwind CSS, Bootstrap

CMS: WordPress

Specialties: OSINT, Data Analysis, Cybersecurity

Databases: SQL, PostgreSQL

Tools: Git, VS Code, terminal/bash

Cloud Platforms: Microsoft Azure, Google Cloud

Operating Systems: Linux, Windows

Other Skills: Project Management, Team Leadership
